DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-20, drawn to a process for coating a pharmaceutical particle.

Group II, claim(s) 21-26, drawn to a composition comprised of pharmaceutical particles.

Group III, claim(s) 27-29, drawn to a particle of ibuprofen.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is directed to a process for coating a pharmaceutical product which has the special technical feature of the three process steps (a), (b) &(c) not shared by any of the remaining groups. Group II is directed to a composition comprised of pharmaceutical particles which has the special technical feature of a composition not shared by any of the remaining groups. Group III is directed to a particle of ibuprofen which has the special technical feature of ibuprofen not shared by any of the remaining groups.

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The specie groups are as follows:

- i) Pharmaceutical Particle

Art Unit: 1711

ii) Liquid Coating Material

iii) Carrier Particles

iv) Surface Active Agent

Applicant is required, in reply to this action, to elect an ultimate species for **each** of the groups to which the claims shall be restricted if no generic claim is finally held to be allowable. For example, for species group (i) applicant may elect ibuprofen, for group (ii) applicant may elect ethyl cellulose, for group (iii) applicant may elect silica, and for group (iv) applicant may elect Poloxamer®.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. The claims are deemed to correspond to the species listed above in the following manner:

i) 2, 7, 11, 12, 14, 20

ii) 3, 8, 11, 12, 13

iii) 18

iv) 28

The following claim(s) are generic: 1, 6, 15, 16, and 27.

Art Unit: 1711

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Pursuant to PCT Rule 13.2 and PCT Administrative Instructions, Annex B, Part I (c), (e), (f), (g), the species of groups (i)-(iv) do not have a common structure and are not art recognized equivalents.

5. A telephone call was made to Gail Dalickas on December 19, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Saira Raza whose telephone number is (571) 272-3553. The examiner can normally be reached on Monday-Friday from 9am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on (571) 272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
